Introduction

This genealogical study is the first publication of our family association, HANEDAN – MAISON D’OSMAN, based in Paris, France, and composed of members spread out over some fifteen countries.

It is dedicated to the young generation of our Family whose history, its extent and the richness of its genealogical documentation only can legitimately differentiate it from other families.

We hope that for our present young generation, knowledge of their roots will contribute to them being better informed, aware of their present position, and build their future and develop their family spirit – all extremely strong and desirable qualities from a purely human point of view.

Descendants of a Family which had not only greatly influenced but also dominated the history of Asia Minor, of Near and Middle East, of the Balkans, of the countries bordering the Black Sea, of North Africa and of Eastern Europe for nearly seven centuries, they perpetuate in our present time the dynasty of one of the greatest sedentary and non-colonial empires of the world, the only one to last for so long – with the Habsburg empire – under the leadership of a single dynasty and one in direct line of succession.

In fact, the Ottoman Family (*Âl-i-Osmân*) held the throne for 641 years, from 1281 to 1922. Its sovereigns, all Sunni Muslims, ruled as Caliphs over the Islamic world for 408 years, from 1516 to 1924 (twenty-nine Caliphs, for 428 years until the death of the 101st Caliph, AbdülMedjid *Efendi*, in 1944). Their multinational empire, the forerunner of the contemporary federal system, was one of the most important civilisations of the second millenium of our era.

From the time of the foundation of the Ottoman dynasty until the abolition of the Sultanate in 1922, thirty-six Sultans reigned in succession, all descendants in direct blood line of the founder, Osman 1st. The succession of the first fourteen sovereigns was effected from father to son, for a period of 336 years, from 1281 until 1617, the year of the death of Sultan Ahmed 1st. He having left sons of minor age, his brother Mustafa – the eldest of Imperial Princes – succeeded him to the throne, thus instituting the tradition of the transfer of authority to the eldest male of the blood line. This system of succession continued not only for 309 years until the death of Sultan Mehmed Vahideddin Khan VI in 1926, but has been perpetuated during the Family’s exile and up to now in determining the Head of the Family (*Hânedan Reisi*).

The Ottoman Sultans carried the titles of *Hâkan* (Khan of Khans), and *Pâdishah* (Emperor) following the conquest of Constantinople in 1453, and of Caliph (*Halife*) and Servant of Mecca, Medina and Kouds-Jerusalem (*Hâdim-ül Haremeyn*) and Commander of Believers (*Emir-ül Mu’minin*) from 1518, and of *Sultan es Selatin’* (Sultan of Sultans, supreme-lord) from 1538.

The princes of imperial blood – *‘ehzade* (Shehzade) – have the title of *Efendi* after their name, and the designation Imperial Highness. Their wives have the title of *HanîmEfendi* after their name, except in the event of divorce, and the designation Imperial Highness. The Princesses of imperial blood have the title of *Sultan* after their name, and the designation Imperial Highness, which they retain after their marriage. Their husbands have the title *Dâmad* before and *BeyEfendi* after their name, and the designation Excellency. Their sons (Princes) have the title of *Beyzade* before, and *BeyEfendi* after their name, and the designation Highness ; their daughters (Princesses) have the title of *HanîmSultane* after their name, and the designation Highness ; they retain their title after marriage.

The present Head of the House of Othman (43rd *Hânedân Reisi*) and its representative, is the grandson of Sultan AbdülHamid Khan II: HIH *‘ehzade* Ertugrul Osman *Efendi*, son of Mehmed Burhaneddin *bin* AbdülHamid Khan II and Aliye Melek Nazliyar Huseyin, born 31 Aug. 1912 in the Palace of Ni^oanta^o (*see p. 27*). In accordance with the system of succession established by tradition, he succeeded his first cousin *‘ehzade* Mehmed Orhan *Efendi*, son of Mehmed Abdülkadir *bin* AbdülHamid Khan II and Mihriban, on 12 Mar. 1994.

During the last twenty odd years, we have witnessed the publication of a large number of books on Ottoman history, arts, economy and politics. And yet, few dealt with the dynastic or genealogical aspects. To establish the current state of the Ottoman Family in 2005 – such is the purpose of this study.

In fact, this work is a continuation of the works of Anthony-Dolphin ALDERSON, Yilmaz ÖZTUNA, Murat BARDAKCI, and of our cousins Osman Selaheddine OSMANOGLU and Prof. Dr. Edhem ELDEM. But it also complements them by offering up-to-date informations, more detailed, duly checked and confirmed by those concerned.

Thus, the first part is devoted to the genealogy of the family, set out according to the branches of descendants of a sovereign. The most appropriate starting point seemed to us to be Sultan Mahmud II, since he was the sole male survivor of the

dynasty when he acceded to the throne in 1808. The genealogical branch of each of his sons – the Sultans AbdülMedjid Khan I and AbdülAziz Khan –, and of his grand-sons – the Sultans Mehmed Murad Khan V, AbdülHamid Khan II, Mehmed Reshad Khan V, Mehmed Vahideddin Khan VI and the Caliph AbdülMedjid II –, are studied in a detailed manner.

An index of geographic locations – the places, towns, regions, countries – where major events in the life of each descendant took place (birth, marriage, death and burial) constitute the second part.

Finally, an index of names, with reference to relevant genealogical branches, ends this work.

In statistical terms, of the 536 descendants of Sultan Mahmud II spread over ten generations (263 males and 273 females), we reckon 265 persons (49.4%) are alive as of December 1st, 2004 (132 males and 133 females), amongst whom 22 persons (4%) share dual ancestors through each of their parents (19 are at present alive: 13 males and 6 females). The average age is 40.6 years. The eldest male is 95 years old and his female counterpart is 90 years old.

Given the subject matter, this work, modest in itself, always remains incomplete. It will need to be constantly up-dated, thereby recording the evolution of the cycle of life of individuals. Despite all our efforts to achieve accuracy, *errare humanum est* ! If we have not been able to avoid an error or an omission, it could only be involuntary.

This was also a collective and collaborative work, with which a large number of members of our family were associated, too many to mention individually here. Without their cooperation, this publication would not have seen the light of day. May they be warmly thanked.
